— parts to be made
of wire or wood
— rigging

Card model of WWI V 108 torpedo boat in scale 1:200.

General construction comments:

1. Asterisk behind part number denotes that the part should be reinforced (laminated) to total thickness of 1mm.

2. Most of the parts are designed to be printed on 60-110lb paper. It may be useful however, to additionally print both sheets on thin (24lb) paper for parts that need to be tightly rolled.
